Minecraft Club

(Autumn Term 2018 - Y4, Spring Term 2019 - Y5, Summer Term 2019- Y6)

Dear Parents

Minecraft is a 'sandbox' game, meaning that players are involved in creating their own virtual 'plot' from scratch as part of the virtual Minecraft world. It is incredibly popular with children and can be played on a wide range of devices including mobiles, tablets, PCs and games consoles. Minecraft allows children to develop important computing skills in their use of the computer to aid them in designing and shaping virtual objects in a virtual world. Playing Minecraft online however opens the possibilities of the children playing Minecraft with friends as well as strangers. This is why I have created our own Hollymount Minecraft Server so that the only people the children will be interacting with is me and the other children in the club. This will ensure that online play will be monitored and 'trolling' others, or as it is known in the Minecraft world 'griefing', is not allowed. We will be playing in Creative mode only.

If you require any more information, please look on the MLE in the Minecraft room where there is lots of information for parents about this game.
